1.0 INTRODUCTION

The California Department of Transportation (Department) is proposing a transportation project to construct a new freeway/expressway located in the High Desert area of Los Angeles and San Bernardino Counties. The new route will extend a distance of approximately 63 miles between State Route 14 in Palmdale and State Route 18 in Apple Valley. The High Desert Corridor (HDC) runs slightly south of El Mirage Road and then follows Air Expressway Road near Interstate 15. East of I-15, the proposed route curves south until it ends at State Route 18 in the Town of Apple Valley at Bear Valley Road. This Initial Site Assessment (ISA) report focuses only on the project area located in San Bernardino County.

1.1 Purpose and Need

The new facility is needed to provide for the existing and projected traffic demand attributed to residential growth and increasing development in the Antelope, Victor and Apple Valley areas. This growth is resulting in inadequate capacity and accessibility along the existing east-west roadways as well as an increasing demand for goods movement corridors and access to regional airports.

This ISA was prepared to identify recognized environmental conditions (RECs) associated with the acquisition of new right of way as defined by ASTM Standard Practice E1527-05. According to this ASTM Standard a REC is defined as the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, past release, or a material threat of a release of any hazardous substances or petroleum products on the property or into the ground, groundwater, or surface water of the property, even if those substances are present under conditions in compliance with environmental laws.

1.2 Scope of Work

The scope of work for this ISA includes the following:

- Regulatory Records Review

- Historical Topo Maps Review

- Historical Aerials Review

- San Born Fire Insurance Review

- Site Reconnaissance

- Review of Agency Records for properties identified as RECs

- Develop a report of the findings and conclusions

2.0 Site Location

The site is located in the high desert of San Bernardino County and extends from the Los Angeles County line east through areas of Palmdale, El Mirage, Adelanto, Victorville and Apple Valley. See Figure 1.

The study area consist of predominately open land with scattered improved properties including gas stations, commercial retail businesses, industrial properties, residential properties, airports, Federal Prison facility, railroad, CalNev Pipeline, and a rock quarry.

2.1 Regional Geology and Hydrogeology

The site is located in the Mojave Desert geomorphic province. The region is characterized by desert plains with isolated mountains and faults. The site area is situated on recently deposited alluvium.

The site is located in the Lahontan Hydrologic Basin. Throughout the majority of the project area the depth to groundwater ranges from 70 to 165 feet below ground surface.

3.0 Site Reconnaissance

A site reconnaissance of the environmental footprint was performed on July 15 and July 18, 2011. The reconnaissance of private properties was limited to observations from the public right of way.

The purpose of the reconnaissance is to assess potential environmental conditions and identify potential RECs. The majority of the project site area is undeveloped vacant land. Significant improvements located within the project area include:

- Residential
- Light Industrial
- Gas Stations
- Federal Prison
- Commercial
- School District Bus Yard
- SCLA Power Plant
- Soil Recycler
- Air Force Base
- Pipeline
- Rock Quarry

Observed property usage adjacent to and within the proposed right of way are described below:

Power Lines

High voltage transmission lines run through the project area from Adelanto east to Junction I-15.

Pipelines

Kinder-Morgan pipeline was observed along Adelanto Road. It appears to run along the north and south sides of Air Expressway Road between Adelanto Road and National Trails Highway. The pipeline services the former George AFB and extends north to Edwards AFB 64 miles to the northwest.

Dairy/Farm

A large dairy is located on the center alignment at Sheep Creek Road. This property use can be associated with above ground and/or underground fuel storage tanks. No tanks were visible from the public road.

Air Force Base

George AFB is within the project limits and is listed as a National Priorities List (NPL) as a Superfund site. This site is listed due to numerous spills, leaks, and dumping of hazardous wastes, resulting in groundwater contamination at various areas within and outside the former base limits. There are several groundwater monitoring wells associated with the contamination plumes.

TPST – Soil Recycling Center

This site accepts contaminated soils for recycling. There are two above ground tanks (approx. 20,000 gallons each) on site. GeoTracker list this site as “Clean Up”, Status is Open. No other information was available.

Above Ground Fuel Storage Tanks

Located on the former GAFB, these tanks are associated with the Kinder-Morgan Pipeline and service the air base.

Abandoned Structure

This site is located along the south side of Turner Road and appears to have been used for illicit dumping.

Rock Quarry

This site has is located east of I-15 in the Apple Valley area. Quarries may contain underground and/or above ground storage tanks.

Truck Service

Site is surrounded by a block wall with no trespassing signs. It appears to service semi-trucks. Possible soils contaminated from fuel, solvents, and metals.

3.1 Project Alternatives

This ISA focuses on the one alternative alignment and proposed B and E variations located in San Bernardino County as depicted in Figure 1.

4.0 Public Record Review

4.1 Environmental Regulatory Database Review

Track Info Services was contracted to provide an Environmental First Search Report. The report is used to identify reported listings within the environmental footprint of the project. The reviewed databases included federal and state lists of known or suspected contaminated sites, known handlers or generators of hazardous waste, known waste disposal facilities and permitted underground storage tanks. The following data bases were reviewed:

NPL: EPA National Priority List: Listing of Federal Superfund sites

CERCLIS: EPA Comprehensive Environmental Response Compensation and Liability Information System- database of potential and confirmed hazardous waste sites that EPA has proposed to be or are on the NPL as well as sites in screening and assessment phase for possible inclusion to the NPL.

RCRA COR ACT: EPA Resource Conservation and Recovery Information System Sites: database of hazardous waste information contained in the Resource Conservation and Recovery Act Information - a national program management and inventory system about hazardous waste handlers.

RCRA TSD: EPA Resource conservation and Recovery Information System Treatment, Storage, and Disposal Facilities- database of hazardous waste information contain in the RCRA Info, an inventory system of hazardous waste handlers, generators, transporters, and disposers of hazardous waste.

ERNS: EPA/NRC Emergency Response Notification System – database of incidents reported to the National Response Center, including: chemical spills, accidents involving chemicals, oil spills, transportation accidents involving oil or chemicals, releases of radioactive materials etc.

Tribal Lands: DOI/BIA Indian Lands of the United States – Database of areas with boundaries established by treaty, statute and/or executive or court order, recognized by the Federal Government as territory in which American Indian tribes have primary governmental authority.

State/Tribal Sites: CA EPA – California Department of Toxic Substances Control (DTSC) information system of known hazardous waste sites.

State/Tribal SWL: CA IWMB/SWRCB/COUNTY - SWIS Solid Waste Information System – California Integrated Waste Management Board maintains a database on solid waste facilities, operations, and disposal sites throughout California.

State/Tribal LUST: CA SWRCB/COUNTY – State Water Resources Control Board maintains a database of sites with confirmed or unconfirmed leaking underground storage tanks.

State/Tribal UST/AST: CA EPA/ COUNTY/CITY Aboveground Storage Tanks Listing

RADON: NTIS National Radon Database – EPA radon data collected from across the United States

State Permits: CA EPA/COUNTY – San Bernardino Hazardous Materials Permits – Handlers and Generators Permit Information Maintained by the Hazardous Materials Division

State Other: CA EPA/COUNTY Cal Sites – contains potential or confirmed hazardous substance release properties

HW Manifest: CA EPA DTSC- maintained by the DTSC Hazardous Waste Manifest used to track and document the transport of hazardous waste from a generator’s site to the site of final disposition

The complete database listings prepared by Track Info and a map depicting locations of listed sites is presented in Appendix C.

4.2 Environmental Database Report Results

Record Source	Number of Sites Identified
NPL (National Priority List)	1 within project limits
NPL Delisted	0
CERCLIS (Comprehensive Environmental Response Compensation and Liability Information System)	0
NFRAP (Archived CERCLA sites)	0
RCRA COR ACT	1 within ½ mile of project
RCRA TSD	0
RCRA GEN	5 within 1/8 to ¼ mile of project
RCRA NLR	0
Federal Brownfield	0
ERNS	9 within 1/8 mile
Tribal Lands	0
State/Tribal Sites	3 within ½ mile
State Spills	0
State/Tribal SWL (Solid Waste Landfill)	4 within ¼ to ½ mile of project
State/Tribal LUST (Leaking Underground Storage Tank)	6 within 1/8 to ½ mile of project
State/Tribal UST/AST	9 within 1/8 to ¼ mile of project

State/Tribal IC (Deed Restricted Sites Listing)	0
State/Tribal VCP (Voluntary Cleanup Program)	0
State/Tribal Brownfields	0
State Permits	19 within 1/8 mile of project
Federal IC/EC	0
HW Manifest	8 within 1/8 mile of project
Total Sites of Environmental Significance	65

The review of the database report identified 65 sites of known significance within the search distance of ½ miles from the project. Two sites were identified within the proposed project right of way.

4.3 Database Assessment

The database report was reviewed to evaluate sites in the vicinity of the project footprint that were considered to have potential to adversely impact the proposed project alignment. Reported release sites identified in the regulatory agency database search report were evaluated with respect to the nature and extent of a given release, the distance of the release site from proposed right of way, and regional groundwater flow direction. Those facilities that may represent a REC in the proposed right of way are identified below along with the corresponding Map Identification Number and a summary of databases on which the facility appears:

- George Air Force Base (GAFB), Air Base Road – East of State Route 395, Adelanto
 Map ID: 1
 This facility is listed on: NPL
 The facility is located in the project area along Air Expressway Road between Adelanto Road and Phantom East Road. The facility encompasses the area north of Air Expressway Road to approximately Desoto Road. The proposed right of way will encroach into this facility.
- Triangle Truck Service (Bussard, Larry D) 21288 Papago, Apple Valley
 Map ID: 8
 This site is listed on: Permit, UST, HW Manifest
 This facility is located within the proposed right of way on Papago Road just east of Corwin Road in Apple Valley.
- Roadway Express Inc., 17401 Adelanto Road, Adelanto
 Map ID: 9
 This facility is listed on: Permits, RCRA, ERNS, UST
 Located on the northeast corner of Adelanto Road and Hibiscus Road in Adelanto. The facility may be partially impacted by the road improvement proposed on Adelanto Road.
- Victorville Federal Prison, 13289 Airbase Road, Victorville
 Map ID: 17
 This facility is listed on: UST
 Site may be impacted by proposed improvements on Air Expressway Road.
- Federal Correctional Complex, 13777 Air Expressway Blvd, Victorville
 Map ID: 18
 This facility is listed on: RCRA
 Sites 17 and 18 appear to be at the same location on Air Expressway Road across from GAFB.
- Fontana Paving (Boral Resources), 17540 Turner Road, Victorville

Map ID: 19

This facility is listed on: LUST, UST, RCRA,GN,

This site appears to be within the proposed right of way near National Trails Highway.

- Adelanto Soil Recycling Center (TPST), 12328 Hibiscus Road, Adelanto
Map ID: 20
This facility is listed on: SWL
The facility accepts contaminated soils for recycling. Site is located adjacent to the proposed right of way.

The full Environmental First Search Report is available in Appendix B.

4.4 Sites Listed on the State Water Resources Control Board GEOTRACKER Site:

1. Calnev – GAFB, no address was provided.
The name Calnev has been replaced by Kinder-Morgan.
Site is in “Cleanup Program Site”, status is open-site assessment underway. Geotracker also states there are “Land Use Restrictions”.
The site is located along the north side of Air Expressway just east of Phantom West Road. This facility stored fuel for delivery into former GAFB. After GAFB closed in 1992, Kinder-Morgan continues to use the above ground storage tanks for storage of fuel delivered to Southern California Logistics Airport (SCLA). The proposed right of way will impact this site.
2. George Air Force Base – Former Skeet Range
18374 Phantom West, Victorville, CA 92392
Military Cleanup Site – Status is “Closed”
Land Use Restrictions
This site was formerly a sheet range for the GAFB. Soils were impacted with Benzopyrene, a product used in the production of clay pigeons. The site is currently occupied by a new building that is for lease.
3. Adelanto Soil Recycling Center (TPST)
12328 Hibiscus, Adelanto, CA 92301
Land Disposal Site – Status is Open
This site accepts contaminated soils for recycling. The site is permitted and has no violations. The proposed right of way may impact the north end of the parcel.

4.5 Department of Conservation Division of Oil, Gas, and Geothermal Resources (DOGGER)

Oil field maps were reviewed on the DOGGR to determine if the proposed project will be located within active oil or gas fields. The proposed project area is not depicted within oil or gas fields.

5.0 Historical Records Review

Historical records were reviewed to identify potential environmental concerns based on past use of parcels. These records include historical aerial photographs, topographic maps, fire insurance maps, and city directories.

5.1 Aerial Photographs Review

Aerial photos for the project corridor were obtained from Track Info Services to evaluate historical usage of the project area. The following aerial photos were examined:

1. Date: 1953
At the Los Angeles County Line the project area appears to be undeveloped desert land. A triangular air base is noted south east of the project area and does not appear to be operational. Very few scattered residences are observed and some show signs of agriculture.
Approaching highway 395 in the Adelanto area, 395 appears as a dirt road. Adelanto Road is paved and where it intersects with Air Base Road there is a residence/agricultural site located on the north east corner. George Air Base is visible north of Air Base Road. Air Base residences are evident just north of Air Base Road at the eastern end of the air base. At the junction of the alignment and National Trails Highway there is a commercial/industrial business located in the southwest corner. Proceeding east across the Mojave River no developments are noted. The rock quarry is visible.
From the rock quarry area the alignment goes southeast towards junction of Bear Valley Road. State Route 18 is visible as a paved road. There are a few scattered residences in the area.
2. Date: 1973
The area of GAFB has additional housing units visible. The City of Adelanto show additional houses. Two above ground tanks are visible on the base just north of Air Base Road. Two structures are visible near the junction of Air Base Road and Turner Road, unable to discern if residential or commercial. There appears to be areas of agriculture near the Mojave River. Route 18 is visible through the Apple Valley area. There are scattered structures and homes.
3. Date: 1989
The area along Parkdale Road and Sheep Creek Road where a dairy now exists shows the area just being developed. Several structures are shown at State Route 395 and Air Base Road. No structures appear south of this intersection where the alignment would intersect. On the GAFB site there appears to be three above ground tanks where there was two in 1973. Two structures are noted at the intersection of Air Base Road and National Trails Highway. There is also a structure just east of Turner Road north of Air Base Road. The rock quarry is visible with no structures. The Apple Valley area show additional residences.
4. Date: 1995
Structures are visible along Adelanto Road within the proposed corridor. Adelanto Soil Recycling Center is visible just south of the proposed corridor. The Federal Prison facility is visible, but not fully developed. There is some development visible along Turner Road as it appears today. Additional residences and businesses are noted along State Route 18 in Apple Valley.

5. Date: 2002

The dairy is visible at Sheep Creek Road and Parkdale Road. Most of the area appears as it does today. Additional scattered residences appear in the Apple Valley Area.

From the historical aerial photographs it is difficult to discern the types of business or commercial property that exist. Some of the sites are identified in the database records report that may be considered REC's. Additional site investigation may be needed to verify a REC.

5.2 Fire Insurance Maps

No Sanborn Fire Insurance Maps are available for the project area.

5.2 Historical Topographic Maps

The following historical topographic maps were reviewed:

Adelanto Quadrangle: 1956, 1968, 1980, 1993

Apple Valley North Quadrangle: 1970, 1993

Apple Valley South Quadrangle: 1971, 1980

Apple Valley Quadrangle: 1957

El Mirage Quadrangle: 1956, 1968, 1992

Shadow Mountain SE Quadrangle: 1955, 1968, 1993

Victorville Quadrangle: 1956, 1968, 1993

The maps show elevation at the Los Angeles County Line at approximately 3,200 feet above mean sea level with gradient sloping in a general north east direction, at GAFB the elevation is at approximately 2,950 feet above sea level and in Apple Valley at Bear Valley Cutoff it is approximately 3,040 feet above sea level. A pipeline is shown on the Victorville 1968 and 1993 maps, it is shown from the north east to the south west. Tanks at GAFB are also indicated on the Victorville maps. No oil wells were noted.

6.0 Findings and Recommendations

The sites that exhibit potential environmental concerns within the proposed footprint are noted on Figures 2 through 13. Based on the findings of this ISA, there are 9 sites within the proposed footprint which may require additional environmental assessment prior to property acquisition. The sites are described in Table 1.

**TABLE 1
POTENTIAL HAZARDOUS WASTE SITES**

FIG. No.	SITE No.	APN	ADDRESS	DESCRIPTION	REGULATORY DATABASE	RECOMMENDATIONS
2	1	457161100000	17900 SHEEP CREEK ROAD EL MIRAGE NW QUADRANT OF PARKDALE ROAD	DAIRY FARM POSSIBLE UNDERGROUND FUEL TANKS AND/OR ABOVE GROUND TANKS	NO	ADDITIONAL SITE ASSESSMENT WILL BE REQUIRED DEPENDING ON WHICH ALTERNATIVE IS SELECTED IN THE AREA OF THE DAIRY. 10	9	463403040000	17130 NAVAJO ROAD APPLE VALLEY	RESIDENTIAL LOT AUTO, CONSTRUCTION DEBRIS	NO	PRIOR TO PROPERTY ACQUISITION TEST SITE FOR METALS AND HYDROCARBONS.

Additional findings include the following:

6.1 Aerially Deposited Lead (ADL)

The presence of ADL within the soils adjacent to the existing right of way should be investigated. Once the preferred alternative is selected an ADL survey should be performed along the outside shoulders within the existing right of way.

6.2 Asbestos Containing Materials (ACM) and Lead-Based Paint (LBP)

Structures built prior to 1986 have potential to contain asbestos and LBP. Structures proposed for demolition within the proposed right of way will require surveys for ACM and LBP prior to demolition.

6.3 Pesticides/Herbicides

Potential for pesticides and/or herbicides within farmlands is a concern for the dairy farm located at Sheep Creek Road and Parkdale Road in El Mirage and at the former GAFB housing area where the pesticide Dieldrin was used extensively.

6.4 Radon Gas

Radon-222 is the radioactive decay product of radium-226, which is found at low concentrations in almost all rock and soil. Radon is generated in rock and soil, and it creeps through cracks or spaces between particles up to the outside air. Although outdoor concentrations of radon are typically low, about 0.4 picocuries per liter (pCi/L) of air, it can seep into buildings through foundation cracks or openings and buildup to much higher concentrations indoors. The potential radon levels for homes in the project area are considered by the U.S. EPA to be moderate between 2 and 4 pCi/L. This project does not involve the construction of new buildings and therefore, radon is not considered to be a concern within the project footprint.

7.0 List of Preparers

This Initial Site Assessment has been prepared under the direction of the following environmental professionals:

Rosanna Roa, Transportation Engineer, Caltrans San Bernardino, CA

Tony Louka, PE, Senior Transportation Engineer, Caltrans San Bernardino, CA

Notice of Disclaimer

Due to the limitations, constraints, inaccuracies and incompleteness of government information and computer mapping data currently available to TRACK Info Services, certain conventions have been utilized in preparing the locations of all federal, state and local agency sites residing in TRACK Info Services's databases. All EPA NPL and state landfill sites are depicted by a rectangle approximating their location and size. The boundaries of the rectangles represent the eastern and western most longitudes; the northern and southern most latitudes. As such, the mapped areas may exceed the actual areas and do not represent the actual boundaries of these properties. All other sites are depicted by a point representing their approximate address location and make no attempt to represent the actual areas of the associated property. Actual boundaries and locations of individual properties can be found in the files residing at the agency responsible for such information.

Waiver of Liability

Although TRACK Info Services uses its best efforts to research the actual location of each site, TRACK Info Services does not and can not warrant the accuracy of these sites with regard to exact location and size. All authorized users of TRACK Info Services's services proceeding are signifying an understanding of TRACK Info Services's searching and mapping conventions, and agree to waive any and all liability claims associated with search and map results showing incomplete and or inaccurate site locations.

SITE DESCRIPTION

Conditions at proposal (July 14, 1989): George Air Force Base (GAFB) occupies 5,347 acres in the Mojave Desert region near Victorville, San Bernardino County, California. It was established in 1941 to conduct tactical fighter operations and provide training for aircraft and maintenance personnel. Industrial operations, including maintenance of aircraft and ground support equipment, involved use and disposal of solvents.

GAFB is participating in the Installation Restoration Program (IRP), established in 1978. Under this program, the Department of Defense seeks to identify, investigate, and clean up contamination from hazardous materials. During IRP tests conducted between March and May 1986, the Air Force discovered trichloroethylene (TCE) in ground water on and off the base. The northeast section of GAFB, used for disposal of solvents, appears to be one source of the contamination, although several other areas on the base are also suspected of contributing to the contamination. In addition to TCE, benzene and 1,2-dichloroethane were detected in on-base monitoring wells at levels that exceed State and Federal drinking water standards. An estimated 11,000 people obtain drinking water from wells within 3 miles of hazardous substances on the base. The wells are upgradient of known contamination.

GAFB has installed additional wells to determine the extent of TCE contamination. Remedial action is planned to recover, treat, and dispose of contaminated ground water. The California Regional Water Quality Control Board is reviewing GAFB's workplan for these activities. GAFB is in the process of contracting for the remedial action.

Status (February 21, 1990): GAFB has contracted for the remedial action, which is scheduled to begin early in 1990.

FINAL DATE: 02/21/1990

technical assistance	Federal Facilities	3/30/2000	3/30/2001

DESCRIPTION:

OU1 includes ground water beneath the northeastern portion of GAFB (Northeast Disposal Area [NEDA] and adjacent off-base areas, the Industrial/Storm Drain (site SD-25[S-20]), and the Sewage Treatment Plant (STP) Percolation Ponds (site WP-26[S-21]). The contaminant of concern in the groundwater is TCE. The source of the TCE is currently unknown. Several waste disposal sites within NEDA were identified as a potential sources. The Industrial/Storm Drainsite has had contaminated sediments removed from the site. The soils beneath this area are not considered hazardous. In 1986, the California Lahontan Regional Water Quality Control Board (RWQCB) adopted the Cleanup and Abatement Order (CAO). The CAO required the USAF to define the extent of TCE contamination in the groundwater beneath the NEDA, submit a plan for remediation, and begin cleanup of the

groundwater. GAFB was placed on the NPL in 1990.

The 5,347 acre George Air Force Base (GAFB) site is located in the western Mojave Desert in the areas of Victorville, California adjacent to the City of Adelanto, California. Victorville is located on Interstate 15, approximately 35 miles north of San Bernardino and 31 miles south of Barstow. The Mojave River flows along the east side of GAFB. Communities within the Victor Valley area include the town of Adelanto, the City of Victorville, and Silver Lakes, Apple Valley, and Hewsperia. The aquifers at the site are a shallow Upper Aquifer and a deeper Regional Aquifer separated by a Middle Clay/Silt Aquitard. The land use for the adjacent properties consist of residential, industrial, and commercial. The site includes the Northeast Disposal Area (NEDA) and areas north of the base, the STP Percolation Ponds, and the Industrial/Storm Drain. These sites consist of burial sites, landfill disposal sites, and spill liquid disposal sites. The STP Percolation Ponds, Site WP-26 (S-21), consists of five wastewater treatment plant percolation ponds that were used from the early 1950s to 1980. The site consisted of the three large main ponds and two smaller ponds that may not have been used. The percolation ponds were used primarily for discharge of treated sanitary wastes, but also may have received waste oils and solvents from industrial shops that discharged to the sanitary system. The Industrial/Storm Drain, Site SD-25 (S-20), is located within the central and northeastern portions of GAFB. The Industrial/Storm Drain has been in operation since the early 1940s. The industrial/Storm Drain consists of the storm drain southeast of the operation apron (East Storm Drain) and the storm drain between the operation apron and the Crosswind (Secondary)runway (West Storm Drain), as well as the outfall ditch downgradient from the storm drains. In February 1990, the USEPA added George AFB to the National Priorities List (NPL), making it a Superfund site. The Fede

ral Facility Agreement (FFA) was signed in Oct. 1990, with the Environmental Protection Agency, the State, the Lahontan Regional Water Quality Control Board. The three OUs were created with the signing of the FFA. OU 1 consists of site SD-25, Site WP-26, and the dissolved trichloroethylene plume detected in the groundwater beneath the northeast portion of the base and adjacent off-base areas. A Record of Decision (ROD) was completed for OU1 in March 1994. OU 3 consists of 60 remaining Installation Restoration Program sites located throughout GAFB. These sites are distributed throughout the base and range in size from a few hundred square feet to over 90 acres. These sites have been designated as disposal pit (DP), fire training area (FT), landfill (LF), radiological waste (RW), spill site (SS), waste pit (WP), or other (OT). Site OT-51 is in the western portion of the George AFB, southwest of the aircraft runways. Five jet engine test cells were located near the site, where jet fuel spills reportedly occurred. Site OT-51 is located in the area of former jet engine test cells 799 and 807. USAF's contractor conducted initial investigations related to Site OT-51 in 1982. James M. Montgomery (JMM) conducted investigation of site OT-51 in 1992. In 1994, another company investigated Site OT-51, by advancing 21 soil borings and installing one groundwater monitoring well. This company also removed an underground storage tank (UST) and septic system. Subsequent investigations included collection of subsurface soil samples, monitoring well installation, and groundwater sampling. The elevated total petroleum hydrocarbons (TPH) (extractable as Jet Propellant Number 4 [JP-4]) and benzene, toluene, ethylbenzene, and xylene (BTEX) concentrations were detected primarily in soil samples from an area around groundwater monitoring well WZ-04. TPH as gasoline (TPH-G), TPH as diesel (TPH-D), and BTEX compounds were detected present in soil samples from some

surrounding borings, with the highest detected concentrations occurring in samples from depths of approximately 100 feet below ground surface (bgs). Site LF-35 is located in the south-central portion of George AFB, and is directly south of Runway 17/35 (North/South Runway) in Subparcels A-21, A-22, D-18 and D-19. LF-35 is classified in the Record of Decision (ROD) as a landfill because an unknown quantity of waste was disposed to the ground surface only (no waste burial occurred) over an unknown period. At the time the site was initially identified, the extent of waste burial was unknown. The landfill reportedly was used for disposal of wood and other debris, which contained asbestos and fiberglass from barracks demolition. Air Force's contractor conducted initial investigations related to Site LF-35 in 1982. The OU3 Remedial Investigation (RI) was performed in 1992, and OU 3 Feasibility Study (FS) was completed in February 1997. The OU3 ROD was signed in November 1998 by the USEPA, Air Force and the state of California represented by the RWQCB, Lahontan Region and DTSC. A Phase I Record Search of the site was conducted, but the location was ambiguous and not easily located. Because the wastes reportedly placed at the site were not considered hazardous, remedial investigation activities were not conducted to specifically address potential contamination. Therefore, during the OU3 RI, no analytical soil samples were collected because there was no threat to human health or to environment. Asbestos and fiberglass waste material at the site is insoluble in water and not mobile in soil. Therefore, unless mobilized via excavation activities, any asbestos and fiberglass present at the site should not pose a threat to human health or the environment. The OU3 FS presented Site LF-35 as a no further action (NFA) site with the recommendation of Land Use Control and Institutional Control instructions for no surface disturbance that would expose pathways for asbestos or fiber

glass fibers. The OU3 ROD states that by placing land use and deed restrictions on the site forbidding disturbance of material, the potential exposure pathways for asbestos or fiberglass will not be completed and protection of human health would be assured. A ROD that addressed OU3 was completed in October, 1998. An Explanation of Significant Differences (ESD) addressing OU3 (Site OT-51) was completed in July 2002. An ESD addressing OU3 (Site LF-35) was completed in November 2003.

UST HISTORICAL DATA

This site was listed in the FIDS Zip Code List as a UST site. The Office of Hazardous Data Management produced the FIDS list. The FIDS list is an index of names and locations of sites recorded in various California State environmental agency databases. It is sorted by zip code and as an index, details regarding the sites were never included.

The UST information included in FIDS as provided by the Office of Hazardous Data Management was originally collected from the SWEEPS database. The SWEEPS database recorded Underground Storage Tanks and was maintained by the State Water Resources Control Board (SWRCB). That agency no longer maintains the SWEEPS database and last updated it in 1994. The last release of that 1994 database was in 1997.

Oversight of Underground Storage Tanks within California is now conducted by Certified Unified Program Agencies referred to as CUPA s. There are approximately 102 CUPA s and Local Oversight Programs (LOP s) in the State of California. Most are city or county government agencies. As of 1998, all sites or facilities with underground storage tanks were required by Federal mandate to obtain certification by designated UST oversight agencies (in this case, CUPA s) that the UST/s at their location were upgraded or removed in adherence with the 1998 RCRA standards.

Information from the FIDS/SWEEPS lists were included in this report search to help identify where underground storage tanks may have existed that were not recorded in CUPA databases or lists collected by us. This may occur if a tank was removed prior to development of recent CUPA UST lists or never registered with a CUPA.

UST HISTORICAL DATA

This site was listed in the FIDS Zip Code List as a UST site. The Office of Hazardous Data Management produced the FIDS list. The FIDS list is an index of names and locations of sites recorded in various California State environmental agency databases. It is sorted by zip code and as an index, details regarding the sites were never included.

The UST information included in FIDS as provided by the Office of Hazardous Data Management was originally collected from the SWEEPS database. The SWEEPS database recorded Underground Storage Tanks and was maintained by the State Water Resources Control Board (SWRCB). That agency no longer maintains the SWEEPS database and last updated it in 1994. The last release of that 1994 database was in 1997.

Oversight of Underground Storage Tanks within California is now conducted by Certified Unified Program Agencies referred to as CUPA s. There are approximately 102 CUPA s and Local Oversight Programs (LOP s) in the State of California. Most are city or county government agencies. As of 1998, all sites or facilities with underground storage tanks were required by Federal mandate to obtain certification by designated UST oversight agencies (in this case, CUPA s) that the UST/s at their location were upgraded or removed in adherence with the 1998 RCRA standards.

Information from the FIDS/SWEEPS lists were included in this report search to help identify where underground storage tanks may have existed that were not recorded in CUPA databases or lists collected by us. This may occur if a tank was removed prior to development of recent CUPA UST lists or never registered with a CUPA.

UST HISTORICAL DATA

This site was listed in the FIDS Zip Code List as a UST site. The Office of Hazardous Data Management produced the FIDS list. The FIDS list is an index of names and locations of sites recorded in various California State environmental agency databases. It is sorted by zip code and as an index, details regarding the sites were never included.

The UST information included in FIDS as provided by the Office of Hazardous Data Management was originally collected from the SWEEPS database. The SWEEPS database recorded Underground Storage Tanks and was maintained by the State Water Resources Control Board (SWRCB). That agency no longer maintains the SWEEPS database and last updated it in 1994. The last release of that 1994 database was in 1997.

Oversight of Underground Storage Tanks within California is now conducted by Certified Unified Program Agencies referred to as CUPA s. There are approximately 102 CUPA s and Local Oversight Programs (LOP s) in the State of California. Most are city or county government agencies. As of 1998, all sites or facilities with underground storage tanks were required by Federal mandate to obtain certification by designated UST oversight agencies (in this case, CUPA s) that the UST/s at their location were upgraded or removed in adherence with the 1998 RCRA standards.

Information from the FIDS/SWEEPS lists were included in this report search to help identify where underground storage tanks may have existed that were not recorded in CUPA databases or lists collected by us. This may occur if a tank was removed prior to development of recent CUPA UST lists or never registered with a CUPA.

The Native American Consultation Database (NACD) is a tool for identifying consultation contacts for Indian tribes, Alaska Native villages and corporations, and Native Hawaiian organizations. The database is not a comprehensive source of information, but it does provide a starting point for the consultation process by identifying tribal leaders and NAGPRA contacts. This database can be accessed online at the following web address <http://home.nps.gov/nacd/>

The Native American Consultation Database (NACD) is a tool for identifying consultation contacts for Indian tribes, Alaska Native villages and corporations, and Native Hawaiian organizations. The database is not a comprehensive source of information, but it does provide a starting point for the consultation process by identifying tribal leaders and NAGPRA contacts. This database can be accessed online at the following web address <http://home.nps.gov/nacd/>

Environmental FirstSearch Descriptions

NPL: EPA NATIONAL PRIORITY LIST - The National Priorities List is a list of the worst hazardous waste sites that have been identified by Superfund. Sites are only put on the list after they have been scored using the Hazard Ranking System (HRS), and have been subjected to public comment. Any site on the NPL is eligible for cleanup using Superfund Trust money.

A Superfund site is any land in the United States that has been contaminated by hazardous waste and identified by the Environmental Protection Agency (EPA) as a candidate for cleanup because it poses a risk to human health and/or the environment.

FINAL - Currently on the Final NPL

PROPOSED - Proposed for NPL

NPL DELISTED: EPA NATIONAL PRIORITY LIST Subset - Database of delisted NPL sites. The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

DELISTED - Deleted from the Final NPL

CERCLIS: EPA COMPREHENSIVE ENVIRONMENTAL RESPONSE COMPENSATION AND LIABILITY INFORMATION SYSTEM (CERCLIS)- CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL.

PART OF NPL- Site is part of NPL site

DELETED - Deleted from the Final NPL

FINAL - Currently on the Final NPL

NOT PROPOSED - Not on the NPL

NOT VALID - Not Valid Site or Incident

PROPOSED - Proposed for NPL

REMOVED - Removed from Proposed NPL

SCAN PLAN - Pre-proposal Site

WITHDRAWN - Withdrawn

NFRAP: EPA COMPREHENSIVE ENVIRONMENTAL RESPONSE COMPENSATION AND LIABILITY INFORMATION SYSTEM ARCHIVED SITES - database of Archive designated CERCLA sites that, to the best of EPA's knowledge, assessment has been completed and has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

NFRAP – No Further Remedial Action Plan

P - Site is part of NPL site

D - Deleted from the Final NPL

F - Currently on the Final NPL

N - Not on the NPL

O - Not Valid Site or Incident

P - Proposed for NPL

R - Removed from Proposed NPL

S - Pre-proposal Site

W – Withdrawn

RCRA COR ACT: EPA RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM SITES - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.

RCRAInfo facilities that have reported violations and subject to corrective actions.

RCRA TSD: EPA RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM TREATMENT, STORAGE, and DISPOSAL FACILITIES. - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.

Facilities that treat, store, dispose, or incinerate hazardous waste.

RCRA GEN: EPA/MA DEP/CT DEP RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM GENERATORS - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.

Facilities that generate or transport hazardous waste or meet other RCRA requirements.

LGN - Large Quantity Generators

SGN - Small Quantity Generators

VGN – Conditionally Exempt Generator.

Included are RAATS (RCRA Administrative Action Tracking System) and CMEL (Compliance Monitoring & Enforcement List) facilities.

CONNECTICUT HAZARDOUS WASTE MANIFEST – Database of all shipments of hazardous waste within, into or from Connecticut. The data includes date of shipment, transporter and TSD info, and material shipped and quantity. This data is appended to the details of existing generator records.

MASSACHUSETTES HAZARDOUS WASTE GENERATOR – database of generators that are regulated under the MA DEP.

VQN-MA = generates less than 220 pounds or 27 gallons per month of hazardous waste or waste oil.

SQN-MA = generates 220 to 2,200 pounds or 27 to 270 gallons per month of waste oil.

LQG-MA = generates greater than 2,200 lbs of hazardous waste or waste oil per month.

RCRA NLR: EPA RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM SITES - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.

Facilities not currently classified by the EPA but are still included in the RCRAInfo database. Reasons for non classification:

Failure to report in a timely matter.

No longer in business.

No longer in business at the listed address.

No longer generating hazardous waste materials in quantities which require reporting.

ERNS: EPA/NRC EMERGENCY RESPONSE NOTIFICATION SYSTEM (ERNS) - Database of incidents reported to the National Response Center. These incidents include chemical spills, accidents involving chemicals (such as fires or explosions), oil spills, transportation accidents that involve oil or chemicals, releases of radioactive materials, sightings of oil sheens on bodies of water, terrorist incidents involving chemicals, incidents where illegally dumped chemicals have been found, and drills intended to prepare responders to handle these kinds of incidents. Data since January 2001 has been received from the National Response System database as the EPA no longer maintains this data.

Tribal Lands: DOI/BIA INDIAN LANDS OF THE UNITED STATES - Database of areas with boundaries established by treaty, statute, and (or) executive or court order, recognized by the Federal Government as territory in which American Indian tribes have primary governmental authority. The Indian Lands of the United States map layer shows areas of 640 acres or more, administered by the Bureau of Indian Affairs. Included are

Federally-administered lands within a reservation which may or may not be considered part of the reservation.
BUREAU OF INDIAN AFFIARS CONTACT - Regional contact information for the Bureau of Indian Affairs offices.

State/Tribal Sites: *CA EPA* SMBRPD / CAL SITES- The California Department of Toxic Substances Control (DTSC) has developed an electronic database system called Envirostor with information about sites that are known to be contaminated with hazardous substances as well as information on uncharacterized properties where further studies may reveal problems. The Site Mitigation and Brownfields Reuse Program Database (SMBRPD), formerly known as CalSites, is used primarily by DTSC's staff as an informational tool to evaluate and track activities at properties that may have been affected by the release of hazardous substances. The SMBRPD displays information in six categories, two of which are found in ST. The categories listed under ST are:

1. State Response Sites.

2. School Property Evaluation Program Properties (SCH)

Please Note: Our reports list the above sites as DB Type (STATE). Other categories found in the SMBRPD are listed in our reports in the DB Types OT and VC.

Each Category contains information on properties based upon the type of work taking place at the site. State Response Sites contains only known and potential hazardous substance release sites considered as posing the greatest threat to the public. School sites included in ST will be found within the SMBRPD's School Property Evaluation Program.

CORTESE LIST-Pursuant to Government Code Section 65962.5, the Hazardous Waste and Substances Sites List has been compiled by Cal/EPA, Hazardous Materials Data Management Program to provide information about the location of hazardous materials release sites. Cortese List sites that fall under DTSC's guidelines for State Response sites are included in our reports in the ST category as are qualifying sites from the Annual Work Plan (formerly Bond Expenditure Plan) and the historic ASPIS databases.

State Spills 90: *CA EPA* SLIC REGIONS 1 - 9- The California Regional Water Quality Control Boards maintain report of sites that have records of spills, leaks, investigation, and cleanups.

State/Tribal SWL: *CA IWMB/SWRCB/COUNTY* SWIS SOLID WASTE INFORMATION SYSTEM-The California Integrated Waste Management Board maintains a database on solid waste facilities, operations, and disposal sites throughout the state of California. The types of facilities found in this database include landfills, transfer stations, material recovery facilities, composting sites, transformation facilities, waste tire sites, and closed disposal sites. For more information on individual sites call the number listed in the source field..

Please Note: This database contains poor site location information for many sites in our reports; therefore, it may not be possible to locate or plot some sites in our reports.

WMUDS-The State Water Resources Control Board maintained the Waste Management Unit Database System (WMUDS). It is no longer updated. It tracked management units for several regulatory programs related to waste management and its potential impact on groundwater. Two of these programs (SWAT & TPCA) are no longer on-going regulatory programs as described below. Chapter 15 (SC15) is still an on-going regulatory program and information is updated periodically but not to the WMUDS database. The WMUDS System contains information from the following agency databases: Facility, Waste Management Unit (WMU), Waste Discharger System (WDS), SWAT, Chapter 15, TPCA, RCRA, Inspections, Violations, and Enforcement's.

Note: This database contains poor site location information for many sites in our reports; therefore, it may not be possible to locate or plot some sites in reports.

ORANGE COUNTY LANDFILLS LIST- A list maintained by the Orange County Health Department.

State/Tribal LUST: *CA SWRCB/COUNTY* LUSTIS- The State Water Resources Control Board maintains a database of sites with confirmed or unconfirmed leaking underground storage tanks. Information for this database is collected from the states regional boards quarterly and integrated with this database.

SAN DIEGO COUNTY LEAKING TANKS- The San Diego County Department of Environmental Health maintains a database of sites with confirmed or unconfirmed leaking underground storage tanks within its HE17/58 database. For more information on a specific file call the HazMat Duty Specialist at phone number listed in the source information field.

State/Tribal UST/AST: *CA EPA/COUNTY/CITY* ABOVEGROUND STORAGE TANKS LISTING-The Above Ground Petroleum Storage Act became State Law effective January 1, 1990. In general, the law requires owners or operators of AST's with petroleum products to file a storage statement and pay a fee by July 1, 1990 and every two years thereafter, take specific action to prevent spills, and in certain instances implement a groundwater monitoring program. This law does not apply to that portion of a tank facility associated with the

production oil and regulated by the State Division of Oil and Gas of the Dept. of Conservation.

SWEEPS / FIDS STATE REGISTERED UNDERGROUND STORAGE TANKS- Until 1994 the State Water Resources Control Board maintained a database of registered underground storage tanks statewide referred to as the SWEEPS System. The SWEEPS UST information was integrated with the CAL EPA's Facility Index System database (FIDS) which is a master index of information from numerous California agency environmental databases. That was last updated in 1994. We have included the UST information from the FIDS database in our reports for historical purposes to help our clients identify where tanks may possibly have existed. For more information on specific sites from individual paper files archived at the State Water Resources Control Board call the number listed with the source information.

INDIAN LANDS UNDERGROUND STORAGE TANKS LIST- A listing of underground storage tanks currently on Indian Lands under federal jurisdiction. California Indian Land USTS are administered by US EPA Region 9.

CUPA DATABASES & SOURCES- Definition of a CUPA: A Certified Unified Program Agency (CUPA) is a local agency that has been certified by the CAL EPA to implement six state environmental programs within the local agency's jurisdiction. These can be a county, city, or JPA (Joint Powers Authority). This program was established under the amendments to the California Health and Safety Code made by SB 1082 in 1994.

A Participating Agency (PA) is a local agency that has been designated by the local CUPA to administer one or more Unified Programs within their jurisdiction on behalf of the CUPA. A Designated Agency (DA) is an agency that has not been certified by the CUPA but is the responsible local agency that would implement the six unified programs until they are certified.

Please Note: We collect and maintains information regarding Underground Storage Tanks from the majority of the CUPAS and Participating Agencies in the State of California. These agencies typically do not maintain nor release such information on a uniform or consistent schedule; therefore, currency of the data may vary. Please look at the details on a specific site with a UST record in the First Search Report to determine the actual currency date of the record as provided by the relevant agency. Numerous efforts are made on a regular basis to obtain updated records.

State/Tribal IC: CA EPA DEED-RESTRICTED SITES LISTING- The California EPA's Department of Toxic Substances Control Board maintains a list of deed-restricted sites, properties where the DTSC has placed limits or requirements on the future use of the property due to varying levels of cleanup possible, practical or necessary at the site.

State/Tribal VCP: CA EPA SMBRPD / CAL SITES- The California Department of Toxic Substances Control (DTSC) has developed an electronic database system called Envirostor with information about sites that are known to be contaminated with hazardous substances as well as information on uncharacterized properties where further studies may reveal problems. The Site Mitigation and Brownfields Reuse Program Database (SMBRPD), formerly known as CalSites, is used primarily by DTSC's staff as an informational tool to evaluate and track activities at properties that may have been affected by the release of hazardous substances. The Voluntary Cleanup Program (VCP) category contains only those properties undergoing voluntary investigation and/or cleanup and which are listed in the Voluntary Cleanup Program.

Please Note: Our reports list the above sites as DB Type VC.

RADON: NTIS NATIONAL RADON DATABASE - EPA radon data from 1990-1991 national radon project collected for a variety of zip codes across the United States.

State Permits: CA EPA/COUNTY SAN DIEGO COUNTY HE17 PERMITS- The HE17/58 database tracks establishments issued permits and the status of their permits in relation to compliance with federal, state, and local regulations that the County oversees. It tracks if a site is a hazardous waste generator, TSD, gas station, has underground tanks, violations, or unauthorized releases. For more information on a specific file call the HazMat Duty Specialist at the phone number listed in the source information field.

SAN BERNARDINO COUNTY HAZARDOUS MATERIALS PERMITS- Handlers and Generators Permit Information Maintained by the Hazardous Materials Division.

State Other: CA EPA/COUNTY SMBRPD / CAL SITES- The California Department of Toxic Substances Control (DTSC) has developed an electronic database system called Envirostor with information about sites that are known to be contaminated with hazardous substances as well as information on uncharacterized properties where further studies may reveal problems. The Site Mitigation and Brownfields Reuse Program Database (SMBRPD), formerly known as CalSites, is used primarily by DTSC's staff as an informational tool to evaluate and track activities at properties that may have been affected by the release of hazardous substances.

The SMBRPD displays information in six categories, two of which are found in ST. The categories listed under

OT are:

1. Unconfirmed Properties Referred to Another Local or State Agency (REF)

2. Properties where a No Further Action Determination has been made (NFA)

Please Note: Our reports list the above sites as DB Type (OTHER). Other categories found in the SMBRPD are listed in our reports in the DB Types ST and VC.

LA COUNTY SITE MITIGATION COMPLAINT CONTROL LOG- The County of Los Angeles Public Health Investigation Compliant Control Log.

ORANGE COUNTY INDUSTRIAL SITE CLEANUPS- List maintained by the Orange County Environmental Health Agency.

RIVERSIDE COUNTY WASTE GENERATORS-A list of facilities in Riverside County which generate hazardous waste.

SACRAMENTO COUNTY MASTER HAZMAT LIST-Master list of facilities within Sacramento County with potentially hazardous materials.

SACRAMENTO COUNTY TOXIC SITE CLEANUPS-A list of sites where unauthorized releases of potentially hazardous materials have occurred.

HW Manifest: CA EPA DEPARTMENT OF TOXIC SUBSTANCES CONTROL HAZARDOUS WASTE MANIFEST INVENTORY-Records maintained by the CA DTSC of Hazardous Waste Manifests used to track and document the transport of hazardous waste from a generator's site to the site of its final disposition.
