

EPOXY POWDER FOR COATING REINFORCING STEEL PRE- QUALIFIED PRODUCTS LIST

The following list of products have been previously tested and found to comply with the requirements for fusion bonded epoxy (FBE) powders for use on epoxy-coated reinforcing steel (ECR). Products not shown on this list must be approved by the Division of Engineering Services, Materials Engineering and Testing Services, Corrosion Technology Branch.

The list is divided into two sections. These include FBE powders meeting ASTM Designation: A775/A775M criteria for flexible coatings applied to reinforcing steel that is fabricated after being coated (postfabricated ECR); and FBE powders meeting ASTM Designation: A934/A934M criteria for non-bendable coatings applied to reinforcing steel that is cut to the required size, bent into the required shape, and then coated with FBE powder (prefabricated ECR).

For inquiries about this list, contact Leo Martinez at (916) 227-7287 or leo_martinez@dot.ca.gov.

FBE Coatings Meeting ASTM Designation: A775/A775M Standard Specification for Epoxy-Coated Reinforcing Steel Bars

1. Corvel Green 10-6071
Morton International, Reading, PA

2. Greenbar 720A009
The Valspar Corporation Powder Coatings Group
